ADVANTAGE SERIES

MACHINE
OF THE YEAR 2019

MODULO2 & PENDISLIDE BASIC

WPM11020V-01

ADVANTAGE
SERIES

The Modulo Advantage is an easy machine suited for tractors of +/- 110 HP. It is made up of an 11,000 l slurry tanker on which a Pendislide BASIC 7.5 m spreading boom is standard fitted. This harmonious combination, which is produced in limited edition, aims at one single goal: providing high-tech spreading efficiency with a maximum of simplicity.

- ✓ MODULO 11,000 l slurry tanker
- ✓ Structure with integrated chassis made of special steel, galvanized inside and outside
- ✓ ADR axle □ 150 x 2000 and 420 x 180 mm brakes
- ✓ Wheels 800/65R32 Alliance A360 181 A8 (Ø 1,850 mm x 800 mm, 9,900 kg per wheel at 40 km/h)
- ✓ Air brakes in proportion to the load
- ✓ Sprung drawbar (cross leaves) for maximum comfort and driving stability
- ✓ 2 LED working lights at the back (with control box in the cabin), end outline marker lamps (4 pieces) and LED side marker lights
- ✓ JUROP PN 106 pump (11,000 l/min at atmospheric pressure - 10,000 l/min at 60% vacuum) - 1,000 rpm - speed-increasing gearbox
- ✓ Maintenance-free self-cleaning syphon (30 l/min)
- ✓ ECOPUMP: special large volume exhaust pipe with oil collector, high air intake and noise level reduction
- ✓ Ø 6" (150 mm) communicating gauge (transparent perspex tube)
- ✓ Pre-equipment for Ø 200 mm not built-in front-JUMBO filling arm (available as an option) and turbo-filler
- ✓ Pendislide BASIC 7.5 m spreading boom with hydraulic folding system
- ✓ SCALPER vertical macerators with 6" manual flow control valves, stone trap and HARDOX counterblades
- ✓ System to execute sequences of operations at the end of lines (Automaton)

ADVANTAGE SERIES

With the "Advantage" concept, JOSKIN wanted to prove that it was possible to reduce the price of agricultural machines without having an impact on quality. To get rid of this budget constraint, JOSKIN bet everything on a "mass" production that was until then not used in the agricultural trailer sector. The concerned models are indeed assembled on dedicated assembly lines so as to produce identical series of machines. Producing a large quantity of a model implies more advantageous prices for the raw materials, a more profitable distribution of the workforce and a higher efficiency of the automated machines. The resulting savings have then a direct impact on the sale price and allow to deliver a high-tech product at the price of a standard one.
