ADVANTAGE SERIES

The Trans-CAP is a versatile tipping trailer that is perfectly suited to agricultural works. The tubular chassis and the body in special high tensile steel make it particularly sturdy. Next to its standard equipment that has already proven its efficiency, the Trans-CAP from the Advantage limited series are fitted with high-tech options. The Roll-Over bogie system with bolted table and the air brakes in proportion to the load certainly allow to increase its capacities.

- ✓ Tapered monocoque body in 4 mm high tensile steel (grade 420; side walls and floor)
- ✓ Body dimensions: 6.39 m - 6.73 m long; 2.18 m - 2.26 m wide; 1.50 m high
- ✓ Technically permissible payload of 18 t and volume of 21.90 m³ DIN
- ✓ 1-part hydraulic rear door (DA) with hydraulic arm integrated in the arm, 500 x 500 mm grain chute and seal
- ✓ 4 front sight windows with perspex closing plate (width: 21 cm; height: 63 cm) with rods
- ✓ 900 mm chassis made of 300 x 100 x 8 mm steel sections
- ✓ 2K industrial paint and finishing lacquer (total: 100 µ)
- ✓ Roll-Over bogie movable bolted running gear
- ✓ ADR axles □ 130 and 406 x 120 mm brakes
- ✓ Free steering axle with shock absorbers and hydraulic locking system (DA)
- ✓ Wheels 600/55R26.5 (Mitas Agriterro 02) 165 D (Ø 1,335 x 626 mm, 7,000 kg per wheel at 40 km/h)
- ✓ Air brakes in proportion to the load
- ✓ Sprung drawbar (parabolic cross leaves) for maximum comfort and driving stability
- ✓ Hydraulic parking stand
- ✓ Oil-fed tipping: 33 l hydraulic ram on double oscillating frame
- ✓ Pre-equipment for tipping stabilizer, cover and front platform

ADVANTAGE SERIES

With the "Advantage" concept, JOSKIN wanted to prove that it was possible to reduce the price of agricultural machines without having an impact on quality. To get rid of this budget constraint, JOSKIN bet everything on a "mass" production that was until then not used in the agricultural trailer sector. The concerned models are indeed assembled on dedicated assembly lines so as to produce identical series of machines. Producing a large quantity of a model implies more advantageous prices for the raw materials, a more profitable distribution of the workforce and a higher efficiency of the automated industrial machines. The resulting savings have then a direct impact on the sale price and allow to deliver a high-tech product at the price of a standard one.
