JOSIKIN

ADVANTAGE SERIES

- MODULO2 16,000-I slurry tanker
- ✓ Monocoque structure made of special steel, galvanized inside and outside
- ✓ Bolted Roll-Over bogie running gear (movable) and adjustable bolted drawbar
- ✓ Sprung drawbar (cross leaves) for maximum driving comfort and stability
- ✓ ADR 130 axles with 406 x 120 mm brakes
- Rear free steering axle with shock absorber and hydraulic locking system (DA)
- ✓ Air brakes with spring cylinder
- ✓ Wheels 710/50R26.5 A 885 (Alliance) 170 D (Ø 1,400 x 732 mm, 8,160 kg per wheel at 40 km/h and 4 bar)

- ✓ JUROP PN 106 pump 540-rpm speed-increasing gearbox (11,000 l/min)
- ✓ Wide angle P.T.O.-shaft (1 side) (Walterscheid)
- ✓ ECOPUMP: special large volume exhaust pipe with oil collector, high air intake and noise level reduction
- ✓ Self-cleaning syphon (30 l)
- ✓ Ø 6" (150 mm) communicating gauge (transparent perspex tube)
- ✓ Pre-equipment for JUMBO filling arm (Ø 200 mm)
- ✓ Pre-equipment for turbo-filler
- Rear buttresses (pre-equipment for rear implement)

With the "Advantage" concept, JOSKIN wanted to prove that it was possible to reduce the price of agricultural machines without having an impact on quality. To get rid of this budget constraint, JOSKIN bet everything on a "mass" production that was until then not used in the agricultural trailer sector. The concerned models are indeed assembled on dedicated assembly lines so as to produce identical series of machines. Producing a large quantity of a model implies more advantageous prices for the raw materials, a more profitable distribution of the workforce and a higher efficiency of the automated industrial machines. The resulting savings have then a direct impact on the sale price and allow to deliver a high-tech product at the price of a standard one.
