

The year of 1984 marked a turning point in the history of the JOSKIN company which produced then its first slurry tanker, a model of 3,500 liter.

Over 30 years later, the agricultural world has significantly evolved, just like the JOSKIN group and the material it is manufacturing. On the occasion of this jubilee year, the JOSKIN company has decided to go back in time and to launch a 1/32 scale model of the first manufactured slurry tanker. This faithful reproduction, that is limited to 3,000 numbered copies, is available for €34 on [www.joskin.com/shop](http://www.joskin.com/shop) or at the JOSKIN Shop in Soumagne (Belgium).
