

JOSKIN proposes now, next to the models of muck spreaders with vertical beaters, a whole new range with horizontal beaters and a spreading table: the Ferti-SPACE HORIZON.

In order to meet customers' increasing demand, JOSKIN follows its ideal and takes up the challenge of new developments so as to propose the adequate technique to its customers.

This model is fitted with a device spreading precisely over the width, even with small quantities per hectare. Since the Ferti-SPACE HORIZON crumbles and shreds very well, it is particularly suited for dry poultry manure, compost, but also lime and organic wastes.

The Ferti-SPACE HORIZON is available in 7 versions from 15,5 to 25,75m³ (manure volume before door). These volumes can be increased with higher body ends (1.4m) and/or extensions.

The spreading device includes: a moving floor with 4 shipping chains (grade 80) with a diameter of 14mm, 2 horizontal beaters with a diameter of 600mm and two discs with a diameter of 1.040mm and 6 adjustable blades. The 1.000 rpm transmission, by P.T.O.-shaft, drives the beaters, which then turns at 400 rpm. Furthermore, a speed sensor is mounted on each element. Its aim is to stop the moving floor when a cam security is engaged.

Model	Off-road payload	Inner body dimensions (m)				Body volume before door	Manure volume before door	Manure volume up to beaters	Axle: □ (mm) - track (mm) - studs	Brakes (mm)
		Length before door	Length up to beaters	Width	Height
