

The people who visited JOSKIN during the International Meeting for the “30 years of production” or during the Open Door Days, which took place at the beginning of this year, had the opportunity to notice the substantial investments made by the JOSKIN Group in order to make its production even more reliable.

JOSKIN marked the occasion by giving 2 extra years of warranty on all its equipment. By extending the duration of its warranty to 3 years, JOSKIN wants to make every effort possible to provide users of its ever more technical machines with the maximum profitability.
